Case Goes Over Two Days After Pleading But Justice Wheeler Refuses to Allow Motions for Further Delays-The

Trial Fixed to Begin Te-morrow. The trial of the American Ice Company on charges of entering into contracts in restraint of trade began yesterday before Justice Charles B. Wheeler of

Buffalo, sitting in an extraordinary term Criminal Branch of the Supreme Justice Wheeler was designated by Gov. Hughes to preside at the trial. The indictment upon which the present trial will proceed was found in June, 1908, and contains counts charging that

the ice company is a monopoly in restraint of trade and that it made arrangements to control the source of supply. The indictment recites that through the manipulations of the ice company ice sold at prices varying from \$1.25 a ton to \$10 a ton. There are four other indictments.

The ice company is represented in court by John B. Stanchfield, Joseph F. Auerbach, Julien T. Davies, Charles H. setting forth the rather complicated history of the proceedings against the company and giving reasons why in its opinion the present action is improper.

John B. Stanchfield moved for a dismissal of the indictments on the ground that when one Grand Jury refused to indict the Attorney-General had no authority to apply for leave to resubmit or to ask for a special Grand Jury; that if it was insisted that the action should proceed, the plaintiff should be represented by the District Attorney rather Attorney-General, and that since Gov. Hughes had placed the case in the hands of the Attorney-General during his first term and had not renewed the order the Attorney-General had no au thority for his action.

The motion being denied Mr. Stanch feld pleaded not guilty in behalf of the American Ice Company and said that he vished to take advantage of the provision of the code which allows a defendant two days between pleading and trial. Wesley M. Oler, president of the defendant company, sat with the counsel and seemed take a deep interest in the opening

Justice Wheeler set the case down for Wednesday morning at 10 o'clock. When this had been done Mr. Auerbach asked Justice Wheeler to further adjourn the case until motions relating to both the civil and criminal actions against the American Ice Company, which are now pending before the Appellate Division, should be decided. Mr. Auerbach declared that without these decisions the present trial would prove nothing. He said that he was anxious to get the matter decided once and for all so that in the future no one could make a business of heckling the ice trust.

James W. Osborne, the special prosecutor appointed by the Attorney-General lieger Clark, protested that to wait for the final decision of the motions might delay the trial for three years. Justice Wheeler denied Mr. Auerbach's motion and the case will be continued on Wednesday, when the question of allowing the defendant a special panel of jurors will be considered.

Of the regular panel of jurors sum-Justice Wheeler set the case down for

Dowling Refuses Injunction Against the City and Manhattan Co.

Supreme Court Justice Dowling handed wn a decision in favor of the defenants yesterday in the taxpayer's suit rought by James Foy against the city of New York, Fire Commissioner Hayes and the Manhattan Fire Alarm Company for a permanent injunction restraining the Manhattan Fire Alarm Company

answer that Foy is not the real person interested in the suit, but that it is brought

es, in its annual report yesterday, showed

GOSSIP OF WALL STREET.

The high rate for call money was 43% per cent., unchanged from the high rate Friday afternoon, but the prevailing rate for renewals was 4 per cent., as compared with 3% per cent. on Friday, and there were few predictions that a rate averaging lower few predictions that a rate averaging lower than 4 per cent, would be seen until the crop moving season is over. The firmness yesterday was naturally associated with Saturday's unfavorable bank statement, with its showing of a reduction in surplus reserve from \$5,000,000 to \$2,000,000, and consideration of the statement very likely inspired much of the selling in the London market before the opening here and much of the selling for London account in the early trading in this market. Later in the day London bought heavily, particularly in Steel. It was then obvious that the bank statement and the accompanying the bank statement and the accompanying advance in call money rates were considered of less market importance here than there

The heavy interest and dividend dis-pursements at the beginning of the last quarter of the year undoubtedly consti-tuted a prime factor in decreasing the reserve reported in the bank statement of actual condition. These disbursements are now returning to the banks and the amount of the return flow provides an interesting question in all conjectures over the condition of the banks this week. Another money movement of equal interest is that resulting from the Hudson-Fulton centennial, with the accompanying expendi-tures by the army of non-residents. Some Tuttle and Thomas D. Adams. The tures by the army of non-residents. Some defence filed with the Court an affidavit of the estimates of this amount have been as extravagant as possible, but there was one by a conservative publication which attracted wide attention yesterday. According to this estimate \$25,000,000 may be regarded as the minimum figure of these large an amount will find its way into the expenditures, though banks, for the reason that a large number of the visitors have drawn on local banks on the order of interior banks with credits in this city. But in this way, as by the direct importation of currency from the interior through the visitors, the local banks have beaufited, and wherever this money movement and the return flow from the October interest and dividend disbursements were considered there was enter tained not the slightest apprehension of any advance in money detrimental to the stock market.

Brokers apprehensive of high . money rates are numerous, but the number of those for weeks advising against purchases of Steel common is a multitude.

In the search for hidden reasons for the continuation of the upward movement in Steel common it was guessed that the company had bought 1,000,000 shares of its common stock and that the company planned a \$75,000,000 bond issue to capitalize the Gary plant. Each of these conjectures was dismissed as entirely without foundation in all well informed quarters.

condition of the crop as of September 25 at 58.5 per cent. This is a loss of 5.2 per cent. in a month, and is 11.2 below the condition reported for the corresponding dat last year and 9.5 below the ten year average The report was bad, but no worse than had been expected since the storm along the Gulf coast and other unfavorable develop on closing prices for cotton or stocks. Mor of the estimates of the crop based on the between 10,500,000 and 10,750,000 bales, a compared with more than 13,500,000 bale last year. There was no such discrepancy between the money values of the two crops and the South sold heavily. This offset at yesterday's prices and at those prevailing the effects of such bullish figures. The on the corresponding date last year. On October 4, 1908, cotton sold in this market around 8%c.: yesterday's prevailing price was not far from 13%c., so that a 10,000,000 for the same time last years, 1,532,602 two bale crop at yesterday's prices has a greater money value than that estimated a year ago for the 1908 crop at the prices then

One result of high prices for cotton futures and estimates of crop shortage always has been greater attention to the harvesting from 13,000,000 to 12,300,000 bales, and the world's consumption is put by many at from 13,000,000 to 13,000,000 to 12,300,000 bales, and the world's consumption is put by many at from 10,500,000 to 13,000,000 to 13,000,000 to 13,000,000 to 12,300,000 bales, and the world's consumption is put by many at from 13,000,000 to 13,000,000 to 12,300,000 bales, and the world's consumption is put by many at from 13,000,000 to 13,000,000 to 12,300,000 bales, and the world's consumption is put by many at from 13,000,000 to 13,000,000 to 12,300,000 bales, and the world's consumption is put by many at from 13,000,000 to 13,000,000 to 12,300,000 bales, and the world's consumption is put by many at from 13,000,000 to 12,300,000 bales, and the world's consumption is put by many at from 13,000,000 to 12,300,000 bales, and the world's consumption is put by many at from 13,000,000 to 12,300,000 bales, and the world's consumption is put by many at from 13,000,000 to 12,300,000 bales, and the world's consumption is put by many at from 13,000,000 to 12,300,000 bales.

FINANCIAL NOTES.

The Manhattan company said in its answer that Foy is not the real person interested in the suit, but that it is brought by two business rivals, the Special Fire Marm Electric Signal Company and the National Dispatch Telegraph Company.

"The municipal fire alarm system is and has been for a number of years notoriously inadequate and deficient in modern methods and appliances to serve the city properly," says the answer. It has accordingly been customary to permit those having devices for the purpose to make auxiliary connections. It is practically an extension of the city's system into houses without expense."

The Manhattan company declared further that it has 3,700 fire alarm boxes in itse, protecting over 1,000 buildings, which hespitals, asylums, theatres, hotels, docks, warehouses, car sheds and factories. More than fifty alarms have been sent in over its wires annually the last eight years. For the permit from the city the company says it has contributed \$2,000 to the firemen's pension fund.

RAILROAD STATISTICS.

Report Prepared on the Revenues and

Expenses of Steam Roads. WASHINGTON, Oct. 4.—The Interstate Commerce Commission has prepared a omprehensive report on the revenue and expenses of steam roads in the United States. The report is compiled from monthly statements filed by the carrier for the first nine months of the fiscal year ended June 30, 1909. Beginning with July 1, 1907, steam railway com-panies have filed with the commission monthly reports of operating revenues and operating expenses. The present report is the most comprehensive and gives more details than any heretofore

The report contains tables showing railway systems and the mileage oper ated by each system at the end of each month. It also gives tables showing by months the revenues and expenses of railway systems operating 500 miles or more for the nine months ended March 31,

more for the nine months ended March 31, 1999, compared with the nine months ended March 31, 1998.

In the other table are found summaries of the monthly reports of revenues and expenses of the fifty-five rallway systems mentioned in the index, operating 208, 1995, 43 miles of line on March 31, 1999.

This table covers approximately 90 per cent. of the mileage and accounts for 94.65 per cent. of the total operating revenues and for 94.53 per cent. of the total operating expenses of steam roads in the United States filing monthly reports of revenues and expenses with the commission.

This table covers approximately 90 percent. of the mileage and accounts for 94.65 per cent. of the total operating revenues and for 94.53 per cent. of the total operating expenses of steam roads in the United States filing monthly reports of revenues and expenses with the commission.

The report also shows summaries of all monthly reports filed by steam roads for the first nine months of the year ended June 30, 1909, compared with the returns applying to the same nine months of the preceding fiscal year as to mileage operated, amounts in totals, amounts per mile of line and ratios of selected items to total operating revenues, all of which are self-explanatory.
